Unit description

PRJ5004 Procurement, Quality and Risk Management provides students with specialised knowledge and skills to manage quality and risk, as well as introducing the key area of procurement management. Students develop skills for identifying the essential tools and techniques for incorporating an organisation's quality policy into a project plan. They also develop skills required for risk management planning, response implementation, and risk monitoring. In addition, the unit considers the processes necessary for planning procurements, identifying project needs, including make-or-buy analysis, determining contract types and analysing their related risks.

Unit Learning Outcomes

On successful completion of this unit, students will be able to:

- ULO1** Examine key concepts of risk management, quality management, and procurement.
- ULO2** Identify quality requirements based on customer needs and identify quality issues.
- ULO3** Apply quality management tools and techniques to develop a quality management plan.
- ULO4** Analyse project risks and apply different tools and techniques to develop risk management plan.
- ULO5** Select appropriate procurement method relevant to project situation and develop project procurement plan.
