

SBM 1103 Project and Program Information & Communication Systems

Unit description

Project and Program Information and Communication Systems aims to develop competencies in the design of appropriate information technology infrastructures for projects and programs in order to facilitate real time communication and collaboration as well as effective virtual teamwork. Information and communication technologies (ICT) play a key role in successful management of projects and programs. Thus, all project and program managers and directors as well as experts participating in projects and programs need to be thoroughly versed in effective utilisation and implantation of ICT. This unit is a core unit in the GradDipPM and MBPM programs.

Learning outcomes

On successful completion of this unit, students will be able to:

- [ULO1] Demonstrate an understanding of effective and efficient information and communication management systems and their importance in management of projects and programs.
- [ULO2] Demonstrate an understanding of systems for collaborative and integrated communication systems and current uses of information technology.
- [ULO3] Develop and implement information management systems and infrastructure for planning and implementing projects.
- [ULO4] Demonstrate an understanding of the PMBOK® Processes for Communication in Projects and Programs
